

Performance meets uncompromising Accuracy

The DI2000™ Inserting Systems gives you fast, high volume productivity and the best in visibility, all in a small footprint.

Productivity with the proof it's right.

It's expected that you successfully insert your documents into a single envelope with virtually flawless accuracy. The DI2000™ inserting system maintains the highest levels of performance during peak processing periods. The precision mail-piece tracking and monitoring ensures accurate processing for each page of every mail piece.

Reliability and flexibility for your most important jobs.

The DI2000™ is built on the unparalleled reliability a proven platform. Its intuitive graphical user interface is designed to save you valuable production time. Plus, with its simple job set up and recall for common applications, you'll be able to reduce your changeover times. The easy, tool-less setup makes job changeover simpler than ever.

You can do a lot with summary information

PlanetPress® Connect, our workflow automation software, unlocks savings, business continuity, and special services from the USPS® to protect private information in your documents. Whether composing documents or working with your fully composed pdfs, PlanetPress creates a Reference File from the summary information in the document. Here are 5 ways we use the Reference File.

01. Your existing document without any changes

02. Reference file raw data

Barcode points to record number (00004)

Name / Street Address / City, State, ZIP

01. Onsite production with recipient-level integrity, tracking, and reporting

02. Business continuity for mailings with Mailstream On Demand outsourced service

03. Integration with CASS, PAVE, NCOA

04. Integration with TrackMyMail for advanced mailing services such as ACS and Secure Destruction

05. Email, SMS
